Temporary Food Facilities at Community Events - SUMMARY -

A. Program Description

Community fairs and festivals that have two or more temporary food facilities need to have an event organizer. Both the event organizer and each individual food vendor need to have permits from the local health department. Environmental Health has developed a simplified permitting process. The following description summarizes event organizer and food vendor responsibilities at community events:

- <u>Event Organizer</u>. The event organizer is asked to: (a) Distribute and then collect completed food vendor applications, (b) Provide a map of the event site, and (c) Assure the event has adequate rest rooms, waste collection and disposal, and janitorial services.
- <u>Food Vendors</u>. Individual food vendors are asked to provide information about their menu and food handling practices so Environmental Health staff can assess risk and advise or inspect accordingly. Individual food vendors are brought into the program as partners when we ask them to complete a self-inspection of their facility and food handling practices.

These instructions do not apply to non-profit charitable organizations sponsoring their own annual fundraising event. At those events, the non-profit charitable organization should complete a *Non-Profit Annual Fundraising Event Application* that can be obtained from Placer County Environmental Health.

B. Fees

1. Event Organizers

Event organizer fees are based on the number of participating **for-profit** food vendors. Vendors that are qualifying Veterans or that represent a non-profit charitable organization or are a Placer County permitted mobile food facility are excluded from fees charged.

C. Attachments

The following attachments (**eleven pages**) further describe the program and provide user-friendly information for the community event organizer and food vendors:

- Event Organizer Instruction and Application (pages 1 to 3)
- Food Vendor Instruction, Application and Self Inspection (pages 4 to 9)
- Food Booth Enclosure and Washing Information (pages 10 & 11)

Temporary Food Facilities at Community Events Application Instructions for Community Event Organizer

A. Introduction

The purpose of this application is to assist Placer County community event organizers in working effectively with the food vendors to assure safe and sanitary food service. This application applies to both for-profit and non-profit vendors participating in community events such as fairs and festivals.

This application is not intended for either: (a) Private events for members and invited guests, or (b) Non-profit charitable organizations holding their own annual fundraising event separate from a more inclusive community event.

B. Responsibilities

Community event organizers have four primary responsibilities:

- 1. Make copies of pages 4 to 11 then distribute to each participating food vendor and then collect (pages 5 thru 8) from the vendors for submission with the *Event Organizer Permit Application*
- 2. Complete the *Event Organizer Permit Application* (pages 2 & 3) and submit it along with the collected *Food Vendor Permit Applications* (pages 5, 6, 7 & 8) and applicable fee to Placer County Environmental Health at least **two weeks** before the event. (Note: You may attach your own site map which includes all items on the checklist.)
- 3. Remind food vendors to **retain** and fill out the **F**ood **V**endor **S**elf **I**nspection form (page 9) on the first day of the event after setting up the booth but prior to beginning operation. This form shall be posted inside the facility.
- 4. Provide adequate sanitation support services for the event, such as chemical toilets with hand washing stations, janitorial services and waste disposal.

C. Fees

Fees for community events are based on the number of participating food vendors and are intended to partially cover the costs accrued by Placer County Environmental Health.

The fees are updated annually and can be found on our website at:

http://www.placer.ca.gov/Departments/hhs/env_health/Applications%20Forms%20Fees/Fee%20Schedule.aspx

Also, please call us at (530) 745-2300 and ask for the Consumer Protection Section, for any questions.

Please note also, that Vendors that are qualifying veterans or that represent a Non-Profit Charitable organization or are a Placer County Permitted Mobile Food Facility are not included in the fee schedule.

D. Additional Information

For additional information, contact Placer County Environmental Health, Consumer Protection Programs, Auburn office at (530) 745-2300, or the Tahoe office (530) 581-6240.

Temporary Food Facilities at Community Events Application for Community Event Organizer

Completion of this application requires: (1) Identification of Vendor Type, (2) Set of completed food vendor applications for all participating vendors, (3) Site map, and (4) Permit Fee.

Temporary Food Facilities at Community Events Application Instructions for Food Vendor

A. Introduction

The purpose of this application is to assist Placer County temporary food facility vendors in working effectively with the community event organizer to plan safe and sanitary food service. This application applies to both for-profit and non-profit vendors participating in community events such as fairs and festivals.

This application is <u>not</u> intended for either: (a) Private events for members and invited guests, or (b) Non-profit charitable organizations holding their own annual fundraiser, separate from a more inclusive community event (see the *Non-Profit Annual Fundraising Event Application* for these events).

B. Responsibilities

Temporary food facility **vendors** participating in a community event have two primary responsibilities:

- 1. Complete *Food Vendor Permit Application* and booth floor plan (pages 5, 6, 7 & 8) and submit it to the event organizer at least **3 weeks** in advance of the event.
- 2. Before the event or at the beginning of the event, perform a self-inspection using the *Food Vendor Self Inspection* form (page 9). **Do not send this form to the event coordinator but post it in your facility.**

Food vendors need to meet all applicable facility, equipment, and food handling requirements listed on the self-inspection form. Placer County Environmental Health staff are available to help vendors plan their food service operation and can answer questions that arise concerning best food handling practices. Based on an assessment of the proposal, Environmental Health staff may provide additional technical assistance by making one or more on-site inspections.

Each year, Placer County Environmental Health offers special training on food safety and best management practices for special types of food service operations such as temporary food facilities at events. We offer TFF Food Safety Class for Event Organizers two or three times a year depending on the availability of the inspectors and the number of attendees. The class normally takes about two hours. Vendors are encouraged to take advantage of these training opportunities.

C. Fees

Placer County Environmental Health charges fees to the event organizer based on the number of vendors participating in the community event. The fee the event organizer charges individual vendors will often include event overhead fees.

D. Additional Information

For additional information, contact Placer County Environmental Health, Consumer Protection Programs, Auburn office at (530) 745-2300, or the Tahoe office at (530) 581-6240.

TEMPORARY FOOD FACILITY OPERATING AGREEMENT BETWEEN VENDOR AND HEALTH DEPARTMENT

I agree that neither I nor any of my representatives will begin operation and food preparation at our temporary food facility until all of the following items are in compliance:

- The food facility is fully enclosed with proper overhead protection, flooring, and 4 sides with windows no larger than 216 square inches (food facilities with products individually pre-packaged in an approved food facility do not require enclosure)
- An approved hand washing system is in place on a table, inside the facility. This includes a water container that allows for hands-free washing, hand soap in a pump dispenser, single use towels in a dispenser, and a catch basin for the waste water. (Not required for pre-packaged foods)
- 3-containers large enough to handle the largest utensil, containing respectively, soapy wash water, a clear water rinse, and a sanitizing rinse are in place, on a table, inside the facility.
- Approved cold holding equipment is available for all cold potentially hazardous foods foods are held at or below 45°
- Approved hot holding equipment is available for all hot potentially hazardous foods foods are held at or above 135°
- Outdoor cooking equipment is separated from public access to prevent food contamination or injury to the public. (This can be done using a rope, fence, caution tape, etc.)

I acknowledge the fact that any food that cannot be determined to be from an approved source through product labeling, receipts, or commissary letter will be subject to impound by authority of the California Retail Food Code Section 114393.

I understand that any person who violates the California Retail Food Code is guilty of a misdemeanor. Each offense is punishable by a fine not less than \$25 or greater than \$1000 or by imprisonment in the county jail for a term not exceeding six months, or by both fine and imprisonment.

If I am found operating without the above items in place, I will be required to cease operation	S
until all food safety requirements have been met.	

I, am legally authoric county health department is relying upon this au	zed to execute this agreement and acknowledge that the athority.

Temporary Food Facilities

Food Booth Enclosure and Washing Information

This informational sheet is designed to assist community event organizers and food vendors meet state enclosure and washing requirements for food booths.

A. Enclosure Requirements

The following table summarizes enclosure requirements applicable to food booths:

Component of Booth	Requirement	Application		
Floor	Smooth and easily cleanable	Pavement, plywood, and canvas are acceptable as flooring, but lawn, dirt, and sawdust are not acceptable.		
Walls & Ceilings				
Full enclosure requirements do <u>not</u> apply: (1) If the vendor only sells prepackaged food (overhead protection is still required) or (2) If the vendor is a non-profit organization holding an annual fundraiser that is not part of a larger community event.	Completely enclose the booth to minimize the entrance of flies.	Walls and ceilings constructed of wood, canvas, plastic, or fly screening. Food service openings need to be equipped with tight-fitting closures.		
Signage Signage requirements do <u>not</u> apply to non-profit organizations holding their annual fundraiser event.	Clearly identify the name, city, state, and zip code of the vendor.	Lettering 1-3 inches high, at least 3/8 inches wide, in contrasting color to background.		

Public Health Importance of Enclosures

Enclosure of food booths is intended to prevent the spread of disease by flying insects, primarily flies. Flies are a concern because of their feeding habits. A brief description of this is presented in the shaded box. Beware, the description is graphic!

When flies land on your food, remember that they have an even greater attraction for feces and rotting flesh. They cannot eat solids, so before feeding they vomit a bit of their previous meal on their current meal. The acidic saliva in their vomit dissolves their current meal so they can eat it. Besides feeding on filthy material, they also collect and spread germs by rubbing their bodies, legs, and wings on the material they are eating. As a result of their feeding preferences and practices, flies are known to be an important agent for the spread of many foodborne diseases, such as salmonella infections, dysentery, etc.

Helpful Hints and Tips

- **○** Shade Pop-Ups are commonly used for ceilings in food booths and are available at garden supply stores or larger retailers.
- Insect or sun screening materials are acceptable for enclosure walls or ceilings and may be purchased at hardware stores in pre-cut rolls.
- **⇒** Screening can be kept closed using Velcro or ties.
- ⇒ For additional information, contact Placer County Environmental Health, Consumer Protection Programs, Auburn office at (530) 745-2300, or the Tahoe office at (530) 581-6240.

SEE NEXT PAGE FOR WASHING INFORMATION

Temporary Food Facilities

Food Booth Enclosure and Washing Information

B. Washing Requirements

The law requires, as an ideal, separate hand washing facilities, **within a temporary food facility**, with hot and cold running water for unpackaged, high risk (potentially hazardous food) food service. These hand washing facilities must be separate from a required three (3) compartment stainless steel sink with dual drainboards. However, the law provides for local enforcement agencies to allow other hand and utensil washing facilities when it deems alternate methods are adequate.

Placer County allows the following in lieu of ideal requirements:

<u>Hand Washing Facilities</u> -- Provide a five gallon water container with warm water and a dispensing valve, which will leave hands free for washing. Also provide a wastewater container, soap dispenser, paper towels and receptacle for waste paper towels within the **food booth**. Thorough hand washing (with soap and warm water) is required:

- a) Upon entering food booth prior to any food preparation
- b) After using the restroom
- c) After breaks
- d) After sneezing or coughing
- e) After handling raw meats
- f) After handling garbage or chemicals or money etc....

<u>Utensil Washing Facility</u> -- Booths with food preparation require three five gallon containers for the cleaning of equipment, utensils and for general cleaning purposes. **These shall be set up inside the booth**. One shall contain soapy water, one with clear water, and the other a bleach/water solution (use 1 tablespoon of 5.25% household bleach or 2 teaspoons of 6% household bleach per gallon of water).

Step 1: Wash in soapy water

Step 2: Rinse in clear water

Step 3: Sanitize minimum 1 minute in sanitizer

Note: Do not rinse utensil after dipping in sanitizer

Step 4: Air dry

<u>Wiping Cloths</u> --Well sanitized tables, counter tops, cutting boards and other food contact surfaces prevent cross-contamination of food and have been shown to discourage flies. Cloths reused to clean and sanitize food contact surfaces must be **kept in a bucket of sanitizing solution**. A common sanitizing solution is 1 tablespoon of 5.25% household bleach or 2 teaspoons of 6% household bleach per gallon of water. Sanitizer in a **labeled** spray bottle is allowed in conjunction with single service paper towels.

<u>Wastewater</u> -- Water and other liquid wastes, including waste from ice bins and beverage dispensing units, must be contained in or drained into a leak proof container. Liquid waste must be disposed of into an approved sewage system or holding tank and <u>must not</u> be discharged onto the ground.
